INTRODUCTION

The Summary Reference Index is the first of two CANSIM catalogues. It summarizes the data bank contents, by subject and by source publication, and provides primary (Matrix) identification numbers which form the key to the second catalogue, the Series Directory. The Directory gives detailed information about the available statistics and the series identification numbers required for data retrieval and manipulation.

As shown in the sample on the following page, the Directory contains titles and descriptive detail for each matrix and its component series. Note in particular the series number at the left: this combines with the matrix number to form the CANSIM series identifier. The second identifier (Databank number) shown at the right appears on various outputs. (Either the CANSIM or Databank number may be used for retrieving data). For further information on retrieval see CANSIM: Users Manual for Data Retrieval and Manipulation, Catalogue 12-531, Statistics Canada.

The index contains information on the data bank as of September 5, 1973. It is available in both English and French. The Series Directory is available in English only. New data sets in CANSIM are announced in the Statistics Canada Daily as they become available. Inquiries should be directed to CANSIM, General Time Series Staff, Statistics Canada, Ottawa. (telephone 995-7406).

An Inquiries List (Appendix A) contains the names and telephone numbers of Statistics Canada and other Agency staff members to contact concerning availability, concepts, methods, limitations, etc. of data in CANSIM.

Descriptive detail given for a matrix (roughly equivalent to "table"), used to identify the series in the matrix, includes the frequency and units, the base in the case of index numbers, whether seasonally adjusted or original etc. Where a major

revision has occurred but the historical unrevised series continue to be of interest and are carried in the base, the series number is prefixed by "T".

A guide to use the Series Directory is given below.

CANSIM SERIES DIRECTORY (Sample)					
SERIES DIRECTORY AS OF OCT. 2, 1972				MATRIX: 000010	First Matrix on this page
Matrix number(1)	000010	ESTIMATED XXXX OF CANADA BY PROVINCE, QUARTERLY, THOUSANDS			Matrix title
Source	EST. XXXX OF CANADA BY PROV. (91-000), DBS				
Matrix note	ESTIMATES FOR CALENDAR QUARTERLY PERIODS, FROM JAN. 1946. QUARTERLY DATA RELATE TO JAN. 1, APR. 1, JULY 1, AND OCT. 1. FOR ESTIMATED XXXX BY PROVINCE, AS OF JUNE 1 FOR YEARS 1946 ONWARDS, SEE MATRIX 39. DATA PUBLISHED APPROXIMATELY 75 CALENDAR DAYS AFTER END OF REFERENCE QUARTER.				
Agency and section responsible for this matrix. See Inquiries List.	DBS 2 0000				
Series number (within matrix)	1	CANADA	46-01-00	PUBLIC	D 123456
	1.1	NEWFOUNDLAND	53-07-00	PUBLIC	D 123457
	1.1.1	ALBERTA		SECURE	D 123458
"T" before the series number indicates an unrevised, or discontinued series which is of possible continuing interest.	T1.20	QUEBEC	55-01-15	PUBLIC	D 123459
					DATABANK number(1)

Starting date of series in the base (year, month, day).
No data available when blank.

(1) The CANSIM identification number (Matrix and series number), or the DATABANK identification number may be used to order series from CANSIM. The DATABANK number is used to manipulate data retrieved from CANSIM in MASSAGER, UTILITY, or RANDOM format. For detailed explanation see CANSIM Users Manual for Data Retrieval and Manipulation, Statistics Canada Catalogue No. 12-531 (revised, 1972).

(2) A list is available on request of PART-SEC series. These are PUBLIC series which contain one or more secured data points.

CANSIM: Summary of Statistics Canada data blocks
by range of Databank Identification
numbers, by subject and approximate
number of series. *

Range of "D" numbers		Subject	Approximate number of series #
From	To		
1	7563	Canadian Statistical Review	2,650
30001	40560	National Income and Expenditure Accounts	1,700
50001	65145	Canadian Balance of International Payments	925
90000	93025	Canadian Statistical Review Historical Summary (annual series)	1,700
100000	100101	Indexes of Real Domestic Product	102
150001	151855	Financial Flow Accounts	1,277

12.	Government Expenditures.....	113*,134*,201	

- I. National Income and Expenditure Accounts (Annual Revised), 13-531 E. and F. (Occasional) - To Be Published. These series represent a complete and comprehensive revision of the Canadian National Income and Expenditure Accounts. These new accounts incorporate major statistical revisions and changes in definitions and structural presentation; they represent an important improvement over the previous set of accounts and a closer relationship to accepted international standards as represented by the recently published United Nations System of National Accounts (Series F No. 2 Rev. 3, New York: 1968).

Prices and Price Indexes, Catalogue 62-002, Monthly, Statistics Canada is a compendium of current statistics on Industrial, Wholesale and Consumer Price Indexes. Each monthly issue includes current monthly data, historical annual data for major series and principal components for periods ranging from four to ten years, and monthly data for up to five years.

Revision Based on 1967 Expenditures

Commencing with the May 1973 index, Canadian consumer price indexes incorporate the latest in a series of periodic updatings which characterise their development since the early 1900s. A feature of the latest revision is the inclusion of updated weights to reflect 1967 family expenditure patterns (and within the food component, 1969 spending habits), replacing the 1957 weights used previously. The time reference base, 1961 = 100, remains unchanged.

To maintain a continuous, long-term series, the revised index is linked to the previously published index for April 1973. Thus the published index up to and including April 1973 remains the official measure of consumer prices to that month, and subsequent price movements are measured by the revised index.

Full details of the latest weighting pattern and other background information on the revised Consumer Price Index, including a comparison of the movements of both the old and the revised series since 1967, are contained in an occasional paper entitled The Consumer Price Index for Canada (1961 = 100) (Revision Based on 1967 Expenditures), Catalogue 62-539, Price \$0.75, available from the Publications Distribution Unit, Statistics Canada, Ottawa.

II. Manufacturing Industries of Canada Catalogue No. 31-203

The concepts and definitions used are available upon request from Analysis & Development Section, Manufacturing & Primary Industries Division.

Manufacturing industry data available in CANSIM have been compiled as defined for the 1969 Census of Manufactures. Certain head offices which in the earlier years have been classified at the industry group level have over time been included with those head offices classified to individual industries; beginning with 1970 all head offices are classified to individual industries.

Series starting with a "5" have been terminated and are combined for all years with the corresponding industries in the series which begin with a "3". S.I.C. 107 is combined with S.I.C. 105. S.I.C.'s 1011, 1012 and 1013 are combined into S.I.C. 101. S.I.C.'s 1391 and 1392 are combined into S.I.C. 139. S.I.C. 3993 is combined with S.I.C. 3999.

The S.I.C. code has been built into the series number in all cases.

I. National Wealth and Capital Stocks.

Stocks and Flows of Fixed Non-residential Capital in Canada

The series given here represent annual estimates of the stocks and flows of fixed non-residential capital in Canada beginning with the year 1926.

The perpetual inventory method which underlies the present estimates starts with annual investment expenditures and estimates of the service lives of the assets. The capital stock estimates for a given year are obtained by accumulating past investment expenditures and adjusting them for the value of investment that has been used up (gross stocks) or adjusting them for the gradual wear and tear and the obsolescence they undergo during the time they are used (net stocks). A comprehensive description of the perpetual inventory method is given in Catalogue No. 13-522 "Fixed Capital Flows and Stocks - Manufacturing - Canada 1926-1960, Methodology".

The series are given by major industries according to the 1960 S.I.C., both in constant (1961) and current dollar valuation covering the following detailed types of components:

1. Building Construction
2. Engineering Construction
3. Machinery and Equipment
4. Capital Items Charged to Operating Expenses
5. Total Components

The component series are presented for the following categories of data:

	Current Dollar Valuation	Constant Dollar 1961 Valuation
1. Gross Fixed Capital Formation (GFCF).....	Yes	Yes
2. Net Fixed Capital Formation (NFCF).....	"	"
3. Capital Consumption Allowances (CCA).....	"	"
4. Mid-year Gross Stock (MYGS).....	"	"
5. Mid-year Net Stock (MYNS).....	"	"
6. End Year Gross Stock (EYGS).....	No	"
7. End Year Net Stock (EYNS).....	No	"
8. Discards.....	No	"

NOTE:

The mnemonics appearing at the end of the series title of some 650 series in the Capital Stocks data block, serve to identify the component series of the CANDIDE model which is an undertaking of the Economic Council of Canada and Statistics Canada.

Capital and Repair Expenditures on Construction

Source: Construction in Canada, Catalogue 64-201. This series (1952-1973) provide annual estimates of capital and repair expenditures on construction, broken down by some 70 different structure types, crossclassified by province and sector. Included are the final data for 1952-1971, preliminary actual data for 1967-72 and intended or forecast data for 1967-1973.

For the most part the data are based on the Statistics Canada surveys of Capital Expenditures. From the same source, another publication "Private and Public Investment" reports the total capital and repair expenditure program, including outlays on machinery and equipment.

Total Value of Construction Work Performed, Annual, in Thousands of Dollars

A - Actual Data from 1952 - 1971
P - Preliminary Data from 1967 - 1972
F - Forecast or Intended Data from 1967 - 1973

Part M Page 13-1

I. Industrial Corporations Quarterly Financial Statistics

The historical quarterly financial statistics for Industrial Corporations from 1962-69 inclusive were published in June 1970. (Statistics Canada Catalogue No. 61-003). Subsequent quarterly publications are available for the years 1970 and 1971 including data in the same format as that in the 1962-1969 historical publication.

In the first quarter 1972 a comprehensive revision of the quarterly survey questionnaire was made. This resulted in revisions to the table formats included in the quarterly publication. The CANSIM matrices for 1st quarter 1962 to 1st quarter 1972 will be terminated, and new matrices and series were established as of first quarter 1970. Data for 1970 and 1971 are revised and rearranged in the new matrices and series. The rearrangement from the old series to the new series is based on the linkage tables printed in the regular 1973 quarterly publications (Statistics Canada Catalogue No. 61-003).

Matrices for 1962-1971

Quarterly Statements of Estimated Assets, Liabilities and Shareholders Equity Unadjusted for Seasonality. (Matrix Nos. Listed under A)

Quarterly Statements of Estimated Revenue, Expenses and Retained Earnings Unadjusted for Seasonality. (Matrix Nos. Listed under B)

Seasonally Adjusted Selected Balance Sheet and Revenue and Expense Items in Millions of Dollars on a quarterly basis. (Matrix Nos. Listed under C)

Quarterly Financial Position and Cash Flow. (Matrix Nos. Listed under D)

Quarterly Balance Sheet and Income Statement Ratios and Percentages. (Matrix Nos. Listed under E)

National Income and Expenditure Accounts

Part B Page 2-1

- I. National Income and Expenditure Accounts (Annual Revised), 13-531 E. and F. (Occasional) - To Be Published. These series represent a complete and comprehensive revision of the Canadian National Income and Expenditure Accounts. These new accounts incorporate major statistical revisions and changes in definitions and structural presentation; they represent an important improvement over the previous set of accounts and a closer relationship to accepted international standards as represented by the recently published United Nations System of National Accounts (Series F No. 2 Rev. 3, New York 1968).

Construction

I. National Wealth and Capital Stocks.

Stocks and Flows of Fixed Non-residential Capital in Canada

The series given here represent annual estimates of the stocks and flows of fixed non-residential capital in Canada beginning with the year 1926.

The perpetual inventory method which underlies the present estimates starts with annual investment expenditures and estimates of the service lives of the assets. The capital stock estimates for a given year are obtained by accumulating past investment expenditures and adjusting them for the value of investment that has been used up (gross stocks) or adjusting them for the gradual wear and tear and the obsolescence they undergo during the time they are used (net stocks). A comprehensive description of the perpetual inventory method is given in Catalogue No. 13-522 "Fixed Capital Flows and Stocks - Manufacturing - Canada 1926-1960, Methodology".

The series are given by major industries according to the 1960 S.I.C., both in constant (1961) and current dollar valuation covering the following detailed types of components:

1. Building Construction
2. Engineering Construction
3. Machinery and Equipment
4. Capital Items Charged to Operating Expenses
5. Total Components

The component series are presented for the following categories of data:

	Current Dollar Valuation	Constant Dollar 1961 Valuation
1. Gross Fixed Capital Formation (GFCF).....	Yes	Yes
2. Net Fixed Capital Formation (NFCF).....	"	"
3. Capital Consumption Allowances (CCA).....	"	"
4. Mid-year Gross Stock (MYGS).....	"	"
5. Mid-year Net Stock (MYNS).....	"	"
6. End Year Gross Stock (EYGS).....	No	"
7. End Year Net Stock (EYNS).....	No	"
8. Discards.....	No	"

NOTE:

The mnemonics appearing at the end of the series title of some 650 series in the Capital Stocks data block, serve to identify the component series of the CANDIDE model which is an undertaking of the Economic Council of Canada and Statistics Canada.
